# THE TRANE FAMILY OF DIGITAL COMFORT CONTROLS

Innovative technology for better climate control.

## Take control for precision comfort.

There's no better way to control your system than with a programmable or nonprogrammable Trane Comfort Control. Each features a user-friendly display with the latest digital technology, and it's easy to set up. So you can enjoy precise, premium comfort with the touch of a button. For cleaner air, there are messages to remind you when the filters

need to be cleaned or replaced. You'll also appreciate the choice of attractive, streamlined designs that fit beautifully into any home decor. Reliable, precise temperature control has never been easier. Ask your independent Trane dealer which model is right for you.

# RELIABLE, CONSISTENT COMFORT IS AT YOUR FINGERTIPS.

## Trane matched systems: Take comfort to the next level.

When you choose a Trane Comfort Control, you'll enjoy the utmost in consistent comfort. But you can enhance your central heating and cooling performance even further by creating a Trane "matched system." A matched system includes multiple Trane components, each designed

and engineered to work together seamlessly to maximize overall performance and deliver exceptional efficiency and reliability. There is simply no better way to create a fresh, comfortable climate for you and your family. Ask your independent Trane dealer for details.

## The perfect system begins with the right components...

### OUTDOOR UNITS

**Air Conditioner:** Cools on the hottest days with reliability you can count on year after year.

OR

**Heat Pump:** Works all year long. Functions efficiently as both an air conditioner and heater, depending on climate conditions.

### INDOOR UNITS

**Furnace:** Warms your home in the winter. Also works with an air conditioner to circulate cool air in the summer.

OR

**Air Handler:** Works with an air conditioner or heat pump to heat, cool and circulate air in homes that are all electric.

### PACKAGED UNITS

A single cabinet that houses both heating and cooling components with flexible installation options. They are typically installed outside at ground level or on the roof.

### AIR CLEANERS

Available in a variety of models, from standard filters to fully integrated air filtration systems. Add a Trane CleanEffects™ system for the ultimate air filtration available.

### ENERGY RECOVERY VENTILATORS (ERVs)

Introduce fresh outdoor air while removing stale indoor air. Efficiently recover heat and moisture from the exchanged air for enhanced comfort and energy efficiency.

### HUMIDIFIERS

Add moisture to the air to alleviate dry skin and reduce static electricity.

### TELEPHONE ACCESS MODULES

Provide remote access by telephone to a communicating system for convenience and peace of mind.

## MAXIMIZE YOUR COMFORT.

These top-of-the-line components feature ComfortLink™ II technology, providing the ultimate comfort connection for efficiency, convenience and enhanced reliability.

### ComfortLink™ II Communicating System

## ComfortLink™ II — connect to exceptional comfort and convenience.

The XL900 comfort control features ComfortLink II technology, which works behind the scenes — allowing your comfort system components to communicate with each other. This sophisticated intelligence automates key functions and ensures proper configuration at installation and throughout the lifetime of your investment. Another benefit: ComfortLink II technology also lets you and your dealer interact with your system like never before — providing real-time operating information and flexible remote telephone access\* — for efficient comfort, convenience and reliability that's second to none.

## Programmable comfort that fits your lifestyle.

Whether you're coming or going, Trane programmable controls will keep you in your comfort zone. Easy-to-understand settings allow you to automatically adjust the temperature in your home according to your family's schedule. For example, you can program your system to an energy-saving setting, then it will reset when you return to achieve the desired temperature at just the right time.

## Warm air. Cool air. Clean air.

Not only can your comfort control help deliver just the right amount of warm or cool air, it can also be programmed to deliver cleaner air as well. When used with Trane air cleaners such as CleanEffects™, our programmable fan options give you flexibility for improving the quality of air that is heated or cooled. Trane Comfort Controls even let you know when it's time to change the air filter, so you'll have the cleanest air possible, all year round.

\* An XL900 comfort control and communicating indoor unit are required for communications capability. A telephone access module is required for remote system monitoring.

## ...used in the right combinations.

### ELECTRIC/GAS

The most common system. This includes an air conditioner, furnace, coil, air cleaner and control.

### ELECTRIC

Choose a heat pump, air handler, air cleaner and control for energy efficiency in almost any climate.

### WARM CLIMATES

When you only need cool air, choose an air conditioner or heat pump, air handler, air cleaner and control.

### PACKAGED UNIT

Common in some geographies, a packaged unit has all components in one cabinet.

# XL900 SERIES 7-DAY COMMUNICATING PROGRAMMABLE COMFORT CONTROLS

Features and components may vary by model and are shown for illustration purposes only.

- ≡ **ComfortLink II™ Compatibility**  
Enables remote phone access\* and provides finely tuned comfort when paired with an indoor and outdoor unit with the ComfortLink II communicating technology.
- ≡ **Diagnostic Alert Light**  
Quickly lets you know when there's a system error.
- ≡ **Critical Error Code Messages**  
Relays over 26 different messages when system requires attention.
- ≡ **Interactive Touchscreen**  
An easy-to-use, responsive touchscreen that regulates the temperature at the push of a button.
- ≡ **Effortless Programming**  
A clear, menu-driven setup makes programming quick and easy.
- ≡ **Programmable Fan**  
Provides better comfort and improves indoor air quality by increasing air circulation and enhancing air filtration when combined with a Trane air cleaner.
- ≡ **Auto Changeover**  
Automatically switches between heating and cooling to maintain maximum home comfort year round.
- ≡ **Backlit Display And Keys**  
Sizable display and illuminated keys make reading the temperature and time easier, even in low lighting.
- ≡ **Streamlined Design**  
Attractive and sleek construction fits discreetly into any home decor.
- ≡ **Real-Time Clock**  
Keeps the time, even when the power fails. Automatically adjusts itself to daylight-saving time.
- ≡ **Filter Reminder**  
Reminds you that it's time to change or clean the filter.

\* An XL900 comfort control with communicating indoor unit and telephone access module are required for remote system monitoring.

## XL800 Series Deluxe Programmable Comfort Controls

Puts complete comfort in your hands, literally. The unit can be removed from the wall and programmed from the comfort of a living room chair.

## XL600 Series Programmable Comfort Controls

Allows you to manage your home comfort to match your lifestyle with 5-day/2-day programming for weekday and weekend settings.

## XR400/XB200 Series Nonprogrammable Comfort Controls

Provide easy, effective temperature management for total comfort in every room with a simple touch of a button.

## Set your comfort control for higher efficiency and higher savings.

With a Trane programmable comfort control, you can enjoy savings on your monthly energy bill in addition to a perfect home environment. Simply program your control to automatically increase or decrease the temperature when you're not home and then readjust to the levels you prefer when you return. During winter, you'll save about 3% of your heating costs for every degree you lower your thermostat, and during summer, you'll cut your costs up to 4% for every degree you raise it. Enjoy saving while maintaining your family's standard of comfort. Savings you can see, and feel.

XB200

Some of our Trane Comfort Controls have a handy information compartment located on the side for storing your Trane dealer's business card or other servicing messages for quick reference. It's one more way that Trane helps you feel right at home.

## Expect more from Trane.

For over 90 years, we've been making products that deliver years of dependable comfort, applying innovative thinking and technology that enhance performance, increase efficiency and make the air your family breathes cleaner. That's because at Trane, it's not just about heating and cooling, it's about making your home a better place for living. You can expect more from Trane.
