

Your Perfect Mate — for life.

Commit to PowerStor Series™ Indirect Water Heaters

Finally, the right one has come along. PowerStor Series™ and PowerStor Series™ SS indirect water heaters are the perfect mates for any boiler or furnace.

These dependable, durable water heaters supply an unprecedented volume of hot water and are built to provide reliable service and high deliverability for many years.

That's why all PowerStor Series™ indirect water heaters offer a **Limited Lifetime Tank and Heat Exchanger Warranty.***

Single Wall models are available in three commercial and six residential sizes. Each one features the Hydrojet® Total Performance System, three anode rods and two inches of non-CFC foam insulation. The five different SS models feature a titanium ferritic 444 stainless steel tank and heat exchanger. You can count on ultra-efficient heat transfer from the Vitraglas® coated, carbon steel coil of the PowerStor single wall and also from the Stainless Steel coil of the PowerStor SS.

Next time you're searching for more hot water, line up a PowerStor next to a boiler for a great relationship.

For more information on the PowerStor Series™ water heaters, please contact your Bradford White representative.

**Count On Bradford White
For Everything Hot Water™**

* Limited Lifetime Warranty applies to residential PowerStor Series™ Single-Wall models and PowerStor Series™ SS models used in residential applications only.
