HEATING & AIR CONDITIONING EQUIPMENT

Warranty:

This NCP product is warranted to be free from all manufacturing defects, material or workmanship, for a period of five years from the date of installation (receipt required). Whether or not actual use begins on this date, or five years from the date of manufacture if the date of installation cannot be verified. Immediate notice to NCP will (a) provide a new or remanufactured part to replace the defective part, without charge for the part itself, or (b) provide a replacement unit. This warranty does not include local transportation, related service, labor, diagnosis calls, refrigerant, or costs of returning defective parts.

If the compressor should fail because of a manufacturing defect, is in the original installation, has been operated under normal conditions, and is in the 2nd to 5th year following the above determined date, NCP will provide, at its option, a new or remanufactured replacement compressor.

Replacement parts are warranted for the remainder of the original product warranty, or for one year, whichever is longer.

NCP may require that defective parts be returned to verify and identify the cause of the defect.

Limitation of Warranties: All implied warranties (including implied warranties of merchantability) are hereby limited in duration to the period for which each limited warranty is given. Some states do not allow limitations on how long an implied warranty lasts, so the above limitations may not apply to you. The expressed warranties made in this warranty are exclusive and may not be altered, enlarged, or changed by any distributor, dealer, or other person whatsoever.

This warranty gives you specific legal rights, and you may also have rights which vary from state to state.
