Thru-The-Wall Condensing Units and Heat Pumps

Condensing Units

NATIONAL COMFORT PRODUCTS LINE IS COMPLETE.

We manufacture three capacity sizes in each of three thru-the-wall models to fit existing openings.

We meet capacity needs from small apartments to large condominiums with model sizes ranging from 1½ to 2½ tons.

Our units are engineered to be compatible with any brand of "indoor" unit to meet all of your new construction and replacement needs...

Why Thru-the-Wall?

- **Better appearance**
- **Ground clutter eliminated**
- **Separate meter savings**
- **No theft or vandalism**
- **Short copper tube runs**
- **Less refrigerant charge**
- **No roof penetration**
- **Easily serviced in any weather**
- **Less expensive installations**

Heat Pumps

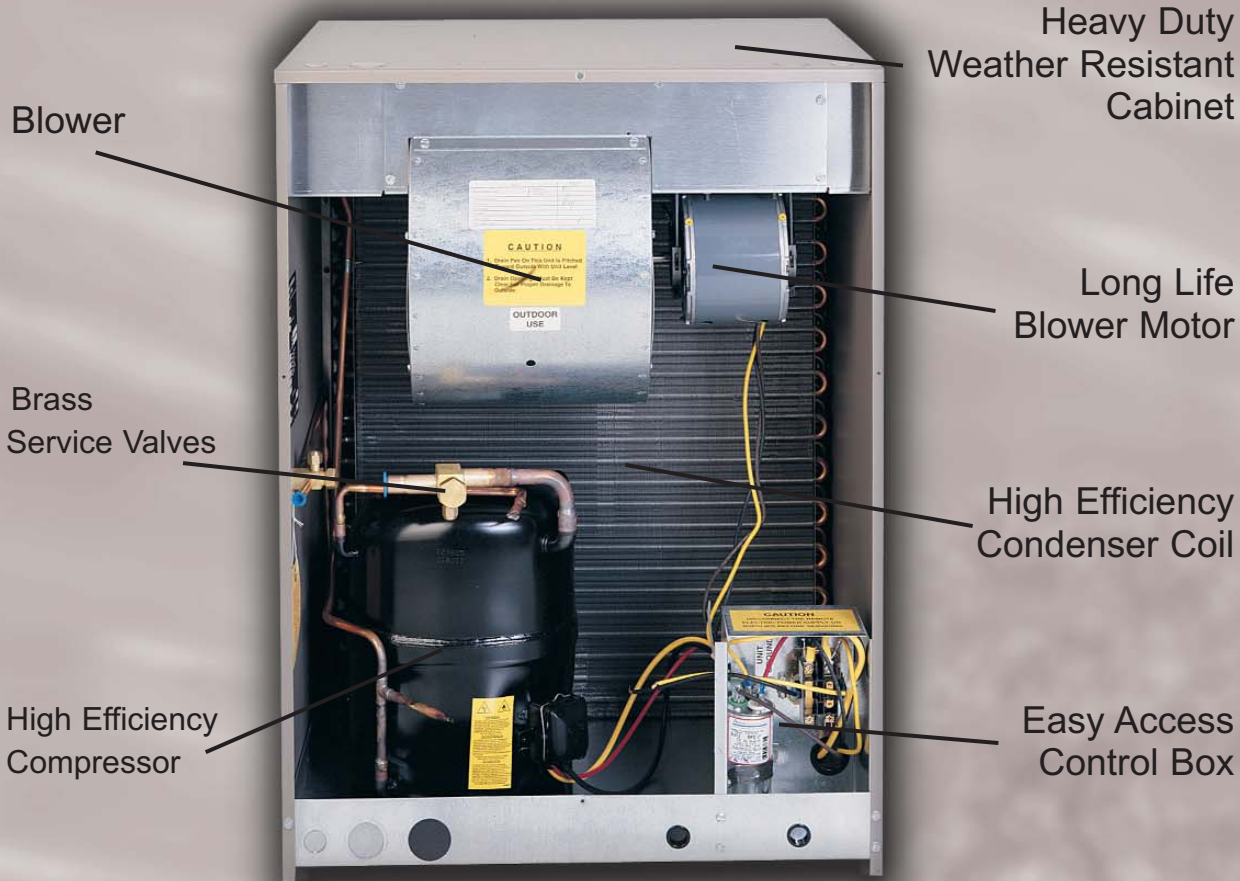

Typical Installations

- High-rise condominiums
- Garden apartments
- Retirement villages
- Hotel or motel suites
- Professional buildings

ADDITIONAL FEATURES AND BENEFITS...

We offer an optional architectural louvered grille on all of our units. These are available in anodized aluminum or can be matched with any color specified. They offer appearance and protection without the loss of efficiency.
